

## ACTIVITY REPORT: JULY - SEPTEMBER 2021

### Childcare and Education

Goodhope provides access to education for children living around its plantations by i. Establishing and managing its own schools and ii. Contributing to assisting existing schools within local communities.

In September 2021, we celebrated the opening of our 10<sup>th</sup> Preschool. The new preschool at PT Nabire Baru, Papua, will provide early education and childcare so that:

- The children of our employees can grow up in safe, healthy and nurturing environments.
- Young children will be equipped with a good early education for future academic achievement and success.
- Mothers are able to work while ensuring the security that their child is protected and has access to early childhood education.

As well as establishing and managing our own schools, we also support existing schools within local communities, e.g. Wami Inpres Elementary School in Papua. The company contributes to enhancing teaching and learning by improving teaching capacity, providing education materials and transportation services.

### Fire Prevention and Response

Goodhope has been using its improved hotspot monitoring system to alert fire response teams of any potential fires in and around concessions. Furthermore, we have continued to strengthen our capacity to handle the threats of fires through the training and guidance provided by an experienced fire expert.

In July 2021, our Fire Fighting Training Program was conducted at sites in Central Kalimantan and Nabire, Papua. Participants included Estate Emergency Response teams, Community Masyarakat Peduli Api Fire Fighting teams and local authorities.

At PT Agro Indomas and PT RIM Capital in Central Kalimantan, 82 participants were trained. A further 100 participants were trained at PT Nabire Baru and PT Sariwana Adi Perkasa, Papua.

Such capacity building activities strengthen the skills and alertness of Fire Fighting teams to ensure that we have sufficiently trained and reliable fire emergency response teams to deal with fire outbreaks within and in the vicinity of concessions.

## Donations to Local Communities

Goodhope has been assisting communities affected by floods nearby to its concessions in Central Kalimantan. PT Agro Wana Lestari, PT Karya Makmur Sejahtera, PT Agro Indomas and PT Rim Capital have donated basic food supplies to support flood-affected communities. The donations have been particularly welcomed amid the ongoing COVID-19 pandemic.

## Greenhouse Gas Emissions Monitoring

Goodhope has extended its greenhouse gas (GHG) emissions monitoring program to include all palm oil mills and associated plantations, and its refining and fats processing facilities. Previously GHG emissions were calculated only for our RSPO certified mills.

We have applied the World Resources Institute (WRI) GHG Protocol to measure our operational GHG emissions at a Group level. This allows us to measure Group emissions under scope 1 and scope 2 of the GHG Protocol. Furthermore, we have extended use of the RSPO PalmGHG Calculator (V.4 November 2019) to all our operating palm oil mills (6 mills in 2020), associated estates and third party FFB suppliers. This provides an estimate of GHG emissions from land-use change, oil palm cultivation, and processing of FFB for palm oil production.

The main purpose of monitoring our GHG emissions is to guide GHG reduction opportunities and measure progress towards reducing GHG emissions.
