Goodhope Ranked #13 in the 2022 SPOTT Ranking

Zoological Society of London (ZSL) has just released the results of this year's SPOTT assessment, which is a prestigious industry-wide tool to measure transparency in the palm oil industry.

Goodhope was ranked 13th among 100 companies which have been covered by the assessment. This is a significant improvement over the previous year when we scored 73.6 % and ranked 21st. Our year-on-year score improvement of 12.3% is the highest among the top 20 companies in the SPOTT 2022 rankings. It is worth noting that we have done particularly well and scored 100% in two important categories: one, HCV, HCS and Impact Assessment and second, Governance and Grievance.

“Goodhope’s steady improvement in the SPOTT ranking is reflective of our highest commitment and efforts undertaken to enhance sustainability and transparency across all our operations,” said Satish Selvanathan, Goodhope’s Executive Director.
