Goodhope's response to Greenpeace report on "License to clear: The Dark Side of Permitting in West Papua"

A Goodhope subsidiary, PT Nabire Baru, was mentioned in the Greenpeace publication "License to Clear: The Dark Side of Permitting in West Papua", issued on 7th April 2021.

The publication makes reference to past issues, which have been addressed in our monthly Sustainability Journey reports on our website. Lessons have been learned and significant progress has been made.

Goodhope takes the issues of Sustainability very seriously and is committed to upholding the highest standards across all our operations.

We look forward to continuing fruitful collaborations with all partners, including Greenpeace. Jointly we will raise the bar.
